

**Bulwark® Announces Another FR Apparel Innovation: New Molten Metal Protection Line**  
*The Latest in Molten Metal Splash Resistant Garments*

Continuing in the tradition of FR apparel advancement, Bulwark Protective Apparel has introduced the Molten Metal Protection line of molten metal splash resistant garments. Molten Metal Protection garments protect against splash from molten metals such as aluminum, iron, steel and cryolite. A blend of 50% Lenzing FR, 40% Superwash and 10% nylon, this fabric provides a soft, lightweight feel and flexibility. The new line features excellent pilling resistance, colorfastness and durability.

Bulwark Molten Metal Protection garments deliver premium protection against molten metal splash, radiant heat, flame and other smelting hazards. The line is ideal for aluminum casting and smelting, iron and steel works due to its ability to shed molten metals. Providing protection from both red and white molten splash, Molten Metal Protection garments also provide protection from cryolite, a catalyst used in aluminum smelters or pot rooms.

Molten Metal Protection garments meet industry standards for flame resistance. The 7.5 oz shirt has an arc rating of 6.6 while the 10 oz pant has an arc rating of 6.5. This apparel guards with protection that is engineered into the fabric. There are no chemical treatments to wash out. The Molten Metal Protection line offers life-of-the-garment flame resistance which is standard for Bulwark apparel.

Bulwark Molten Metal Protection is available in a 7.5 oz chambray twill shirt and a 10 oz navy twill pant. Molten Metal Protection garments can be dry cleaned or laundered in home or industrial-type equipment at reduced wash and drying temperatures.

The Molten Metal Protection line is yet another example of Bulwark continuing to lead the flame-resistant protective garment market by seeking out, evaluating and implementing innovation in fibers, fabrics, finishes and garment construction. We will achieve continuous improvement in garment design and wearer comfort while delivering value to our customers, never forgetting that wearer safety must always be our primary concern.
